Subject: Professional Recommendation for Mr. Indirakumar Rajendiran – Technical Speaking and Community Contribution

Dear Fellowship Assessment Panel,

I am pleased to provide this recommendation in support of **Mr. Indirakumar Rajendiran's application for Fellowship of BCS, The Chartered Institute for IT**.

I am writing in my capacity as General Manger **at Wikpolt Softwares**, which organised **Tech Meetup 2025**, held on **20 September 2025 in Nagercoil, Tamil Nadu, India**.

Mr. Indirakumar was invited as a technical speaker to present **"The Rise of AI Agents, Large Language Models, and Generative Intelligence: Practical Patterns for Every Developer."** He delivered his session remotely through Google Meet to participants attending our in-person technology meetup.

His presentation focused on making emerging artificial intelligence technologies understandable and relevant to software developers. It covered AI agent concepts, reference architectures, practical implementation patterns, demonstrations, risk management and responsible AI practices.

The session contributed to our objective of helping developers and technology enthusiasts understand how generative AI concepts can be applied to real-world software development.

During the interactive discussion, an attendee asked how AI agents could be integrated into existing enterprise applications while maintaining appropriate security controls and human oversight. Mr. Indirakumar explained a practical approach involving controlled API access, validation mechanisms and human approval for sensitive operations. His explanation connected AI architecture concepts to implementation challenges faced by software developers and contributed to the technical discussion among participants.

Mr. Indirakumar's participation demonstrated his willingness to share professional knowledge beyond his employment responsibilities and contribute to the wider software development community.

We appreciate his contribution to our technical learning initiative and consider his participation a positive example of professional knowledge-sharing and community engagement.

Based on his contribution to our event, I am pleased to support his application for BCS Fellowship.

I confirm that the information provided in this letter is based on my direct professional involvement and supported by records available for my review.

Yours sincerely,

Addly Daniel
